**2024 | Spring Events & Open Enrollment Training**

*Training Your Workforce to Meet Tomorrow’s Challenges*

---

**CONNECT**

**Electric Mobility Innovations Conference**
Jan 31 | 12-4pm (ET)
The Electric Vehicle boom is here and a forecast suggests that by 2035, more than half of new passenger vehicles sold worldwide will be electric. The EV Battery Innovations Conference will feature professionals from EV infrastructure, battery manufacturers, and OEMs, along with transportation and energy officials, to discuss EV opportunities and how to invest in the workforce to meet the demands of the automotive sector.

**Automation, Maintenance, & Reliability Summit**
Mar 21 | 8am-2pm (ET)
Explore how Industry 4.0 is enabling digital transformation decision-making and the role played by artificial intelligence (AI) and machine learning (ML), robotics, how the numerous existing sensor data can be used sensibly with connectivity, and how all of this leads to reliable control.

**Critical Networks in Manufacturing**
May 9 | 8am-1pm (ET)
If you could design your factory to be everything you wanted it to be, which technologies would you include? What would your throughput look like? And most importantly, do you have a secure and private network in place to help bring your plans to life? Join us as we discuss how intelligent wireless infrastructure can accelerate your manufacturing operations and improve your security, reliability, scalability, and integration.
